Summary

I am an independent graphic designer influenced and passionate about typography, modern/ist design and architecture. Specialized in the field of visual communication, I work across a spectrum of disciplines — always committed to output long-lasting, thoughtful and intelligent design work.

Experience

2017 (Jul) — 2018 (May) / Graphic designer at Studio • v-a

During almost a year, along with these fine folks in their studio located right at Lisbon's heart, I have worked on several projects mainly for high profile clients both in the traditional printed matter as well in the digital realm.

2014 — Present / Independent graphic designer

I have developed my professional experience as a graphic designer mainly on a self-taught and autonomous basis. Not only these experiences helped me to build and consolidate many design processes and methodologies, but also taught me invaluable skills on how to manage a small (solo) design practice.

Skills & Competences

Problem-solving through a creative mindset
Strong presentation and communication skills
Ability to work in a wide variety of projects
Strong conceptual skills
Highly methodical and organized
Good interpersonal skills
